- Pinal - 12 SP3
- Santa Cruz - 12 SP3
- Yavapai - 12 SP1
- Yuma - 9.2 SP1 scheduled for upgrade to 12 SP3 on 8/21

ONBASE SUPPORT TIMELINE

OnBase Support Timeline – Windows 8.1/IE 11 deployment

ONBASE 12 SP3 & WINDOWS 8

- OnBase 12 SP2 is the minimum version that will support Windows 8
 - Databank/Hyland will not support older versions of OnBase with Windows 8
- SQL 2012 is supported (not required) with OnBase 12 and higher
 - SQL 2008 can no longer be purchased for new database servers
 - Service Pack 2 for Windows Vista is required to connect so please **plan with AOC before upgrading** to SQL 2012
 - Windows XP is not supported with SQL 2012
- All Courts should be **upgraded to OnBase 13 by the end of 2014**
 - Needed to support the rollout of the new hardware, new version of Windows, and new version of browser
 - Possibly earlier deadline depending on rollout schedule if later Windows/IE version used for refresh
- Some older scanner models are no longer supported with Windows 8
 - Please test your hardware and make sure Windows 8 drivers are available for the models in use
