i Boot Loader

An extraction method that performs a physical extraction when the device is in bootloader mode.

With this extraction method, the operating system is not running, so the device cannot connect to the mobile network.

It bypasses any user lock and is forensically sound.

The bootloader extraction does not support extractions from a memory card and SIM card.

Roger! See you Friday. I'll let you know if anything else happens. Have fun in the cold!

Dude! Too dramatic. Ted doesn't need that. We'll let him find out without it killing him. He's been through enough. I need to get to work. Go swim or something. It's too early there to be awake.

Let's get Ted into town, one of us sets a date with her, and then we all show up. He can see with his own eyes.

I don't know. Let me see how she responds to me. It's definitely her. Just don't say anything yet. We already know she is pursuing other guys. It can't be just us. I took screen shots of most of my conversation with her before she hid her profile. But she is still responding to me too. If she gives me her number, I am going to put her on blast. Otherwise I might give her the chance to come clean and tell him herself. Either way, he is going to find out. Better he finds out now than after he gives her that ring. Definitely fucked up!

I'll see you Friday. Let's grab a beer and figure out what to do for Ted. I have to go back to Colorado Springs in a couple weeks. Maybe I will just tell him in person and show him all this.

Man, you were right. This sucks. I found Becky's profile and started a conversation with her. She is on the prowl and looking to hookup. She actually hid her profile before I took the screen shots, but she continued to engage. She even gave me the same line about being the reason to cancel her membership and gave me her number. She wants me to call and get together. I looked up the number online and it's definitely her, check the last two pages. What are we going to tell Ted? And when?
