Statement of Work (SOW) 13.03 Statewide Arizona Courts Electronic Filing System

Addendum 1

June 24, 2013

The following revisions shall be incorporated into the Statement of Work 13.03, solicitation Request for Proposal 13-03:

Section 3.1.1.2 – **Product software operates on Court Information Technology and Information System product standards**³, SOW 13.03 page 14, shall now read as follows:

Product software supports Court Information Technology and Information System product standards for server operating systems (Microsoft Windows 2008 R2), database management systems (Microsoft SQL Server 2012 SP1), messaging systems (IBM MQ v7.0.1), electronic mail (Microsoft Exchange, Microsoft Outlook, and Simple Mail Transfer Protocol gateway), web platform support (Microsoft IIS v7), software development framework (e.g., C#, ASP.NET for Web Apps, .NET Framework v4), document management system (Hyland OnBase v11 SP2), and anti-malware (McAfee Virus Scan Enterprise v8.8) systems. Vendor must provide product software updates within 12 months of the Court updating its commercially available software.

A copy of the Arizona Judicial Branch Enterprise Architecture Standards may be obtained at the following web address:

<http://www.azcourts.gov/Portals/87/Archives/FY12/12FEB10/EAS2012.pdf>

There are no further changes at this time to the solicitation.

³ Susceptible Offerors are not required to demonstrate interoperability with IBM MQ, Hyland OnBase, or McAfee Virus Scan Enterprise during the onsite product demonstration process; however, Offerors must attest to their ability to support these Court standards in their RFP 13-03 responses.
