## ADULT PROBATION POPULATION

During FY 2014, the average<sup>1</sup> number of people on probation was 78,925. For purposes of funding and caseload ratios of 65:1 that are reported to the Joint Legislative Budget Committee, the AOC categorizes a subset of those on probation as “direct supervision” cases. During FY 2014, the average number of direct supervision cases was 37,953. Probationers who are not included in the direct supervision count include individuals categorized as being on administrative supervision or indirect supervision, incarcerated (jail or prison), supervised by another state, absconders, deported, prison with a probation tail, unsupervised, jail flat time, federal custody, and over 90 day warrants.

For purposes of this report, a supervised probationer is defined as a probationer who is directly supervised by an adult probation officer. Table 1 shows the average number of people on probation by county in FY 2014 and the average number of people on supervised probation (direct supervision includes standard and intensive probation).

## PROBATION REVOCATIONS

If a probationer is found in violation of the condition(s) of probation, the probation grant can be revoked. In Arizona there are three types of revocation classification: revoked with no incarceration; revoked to jail; and revoked to prison (DOC). By the end of FY 2014 there were a total of 5,454 dispositions that resulted in probation grants being revoked. Table 2 shows the number of dispositions in each county that resulted in a revocation during FY 2014. Statewide, the number and type of dispositions that resulted in revocations were:

- 4,694 dispositions resulted in a revocation to the Department of Corrections (see Appendix A for a detailed breakdown of the costs for private bed placements for the Department of Corrections);
- 735 dispositions resulted in a revocation to jail; and
- 25 dispositions resulted in a revocation with no incarceration.

### Year to Year: Overall Changes in Revocations

From FY 2013 to FY 2014 Arizona experienced a 14.5% increase in the number of dispositions that resulted in a revocation. There was an increase of 14.3% in the rate of dispositions that resulted in a revocation to the department of corrections; and a 15.6% increase in the rate of dispositions resulting in a revocation to jail. Tables 3 through 5.1 outline the increase

and decrease of dispositions that resulted in a revocation to the department of corrections, jail, or no incarceration according to individual counties and statewide.

## Base Line to Fiscal Year: Overall Changes in Revocations

From FY 2008 Base Line to FY 2014, Arizona experienced a 29.4% decrease in the number of dispositions that resulted in a revocation. There was a decrease of 31.0% in the rate of dispositions that resulted in a revocation to the department of corrections; and a 2.2% increase in the rate of dispositions resulting in a revocation to jail. Tables 6 through 8.1 outline the increase and decrease of dispositions that resulted in a revocation to the department of corrections and jail according to individual counties and at a statewide level based on a comparison of an increase and decrease from the base line of FY 2008 to the actual fiscal year.
