<b>SUMMARY:</b>
<p><b>Updates are listed as action items in the event that members feel the need to create motions in response to the material shared. No motions are <u>required</u> to be made.</b></p> <p>The <b>CACC Update</b> recaps the status of trial court projects being monitored on COT’s behalf, some of which are priorities from the previous annual meeting. The CACC chair will also review some key project accomplishments, milestones planned for next year, and challenges faced by current statewide projects, some of which will require (already committed) funding to address.</p> <p>The <b>PACC Update</b> provides progress with probation automation over the past year and a preview of efforts in probation automation over the next fiscal year. Bob will update members on the success of the JOLTSaz/Agave/CAMMS integration project in Pima County, the AZYAS rewrite underway, and approach to the JOLTSaz statewide version.</p> <p>The <b>TAC Update</b> focuses on key technology topics discussed during the year and the anticipated work of the subcommittee during the next fiscal year. Karl will focus attention on the technology refresh effort and its resultant complexities in dealing with non-ACAP computers on AJIN as well as a new COJET mandate for yearly security awareness training at all courts.</p>

The **e-Court Update** recaps the progress being made with three “e” projects at the various levels of court. Marcus will update members on specific projects and timelines for expanding the projects’ depth and reach.

Presentations received from the subcommittee chairs are attached.
